

The image features a complex abstract composition of black and white geometric shapes and lines. A large, solid black shape dominates the left and bottom portions of the frame, with a curved boundary on its right side. A thick black diagonal line extends from the top left towards the bottom right, intersecting the large black shape. In the upper left corner, there are several thin, overlapping lines that create a sense of depth and movement. The text '支持可控硅' is positioned in the upper right quadrant, set against a white background.
